

Glue Roll Gap Sensor

Upgrade Amplifier

Applicable to obsolete Glue Roll Gap Sensors

Upgrade Decisions

This upgrade integrates newer gap sensor into glue machine to replace obsolete unit.

The amplifier is eliminated. The upgrade includes sensor and mounting parts, installation instructions, and updated calibration procedure.

Upgrade Benefits

- Prevents possible downtime due to failed, obsolete components.
- OEM (Original Equipment Manufacturer) engineered solution assures software compatibility for smooth installation
- As the OEM, BWP provides upgrades and service specific to your make and model of machine-- this ensures future parts compatibility and troubleshooting
