

Singlefacer PLC & Touchscreen

Upgrade Application

Applicable to all Singlefacers that have obsolete GE processors or PLC

Upgrade Description

This upgrade replaces the obsolete PLC controls system and includes a new touchscreen. This upgrade includes all necessary engineering, PLC, I/O modules, new touchscreen, other electrical components, print updates, manual updates, and installation instructions.

Upgrade Benefits

- Prevents possible downtime due to failed, obsolete components.
- OEM (Original Equipment Manufacturer) engineered solution assures software compatibility for smooth installation
- As the OEM, BWP provides upgrades and service specific to your make and model of machine-- this ensures future parts compatibility and troubleshooting
- Modern Rockwell Automation Control System
- Easier Roll Change process through touchscreen
- Eliminates obsolete touchscreen controls
